AI PRODUCT LEADERSHIP

AI-native product leader, product owner, and founder. Over 12 years of international operating experience across enterprise software, startups and program building, from Oracle to the DoD, startups, and the Olympic Games. Translates stakeholder needs into product decisions and leads teams through delivery and customer handoff. AI-native successes include:

- Product management of a machine learning app for the DoD (Hypergiant).
- Used AI modeling to accelerate R&D in materials science and performance modeling for three key inventions brought to market. (EYR)
- Developed an AI assisted athlete development model for Olympic sport used by Olympians from multiple countries through training models on large datasets of historical performance metrics. (BSI)
- Built and managed operations for a national Olympic program using AI and agentic workflows across recruitment, fundraising, talent identification, procurement, performance tracking, CRM and development models while simultaneously competing and qualifying for 2 Olympic Games, with no outside staff. (BSI)

YALE SCHOOL OF MANAGEMENT, **New Haven, CT**
Master of Business Administration (MBA) **2023**

- Israeli Student Scholarship at Yale SOM
- Clubs: Out of Office (LGBTQ+), Hockey Club Goalie Coach

MASSACHUSETTS INSTITUTE OF TECHNOLOGY (MIT) **Cambridge, MA**
Bachelor of Science (BS), Mechanical Engineering with focus on Management Application **2014**

- Goalie, Men's Ice Hockey Team; Opinion Writer, MIT Tech
- Lead fundraiser and director for Burton-Connor Dormitory gym revitalization

---

ISRAEL BOBSLEIGH AND SKELETON FEDERATION (BSI)
Founder, 2x Olympian, Program Manager **2014 – 2026**

- Founded the current Israeli National Bobsled team; personally raised over $2 million for the Israeli Olympic program and managed a high-six figure budget through qualification and competition at 2 Olympic Games
- Used AI agents as an ad-hoc organizational structure to enable a $250K reduction in costs while becoming first modern bobsled athlete to self-direct an entire program to its first Olympic Games with no outside staff
- Extensive use of AI and agentic workflows to manage all aspects of the program, including recruitment, fundraising, building development models, talent ID, procurement, performance tracking, CRM, and more, allowing me to not only compete as an Olympic athlete, but also manage a $650,000 annual budget program
- Owned Olympic Federation strategy across three Olympic quadrennials while competing. Grew BSI from a single athlete to the most active Israeli Winter Olympic Program; personally responsible for over half of the 2026 ISR Olympic team
- Developed radically successful and first-of-its kind AI-assisted athlete performance and development model based on training models on large data sets of athlete performance and scientific studies, used by multiple Olympic athletes
- Established the first financial partnership between the Israeli Olympic Committee and BSI; subsequently facilitated a multi-million dollar (~6-8mm USD) funding partnership for the Israeli Olympic Committee through LA'28
- Negotiated National Olympic Committee acceptance of BSI after 14 years of failed efforts; became the second athlete since 1948 to compete in both bobsled and skeleton at the Olympic Games
- Initiated and negotiated a partnership with Shitamachi Heavy Industries (Japan) to supply Israel Bobsleigh with multiple bobsleds, saving the program over $100,000

EYR, *sports apparel and athletic shoe startup* **Remote/Global**
Founder, Product Manager and Designer **2020 – 2026**

- Funded and led AI-enhanced materials and performance science R&D through market delivery of three key ice-sports equipment innovations. Used AI workflows to accelerate research, design, and development.
- Entered formerly monopolistic markets, generating approximately $25,000 USD/yr; athletes from global programs (USA, Canada, Italy, Monaco, and others) used EYR equipment at Olympic Games
- Invented and shipped the first significantly new bobsled sprint shoe design in over 25 years. AI-assisted prototyping and performance modeling resulted in a shoe 30% cheaper to manufacture, and with a measurable performance boost
- Harnessed AI to redesign the decades-old bobsled protective "burn vest" with novel materials and configurations; product now holds the largest market share of bobsled protective vests in North America.

- Invented a system to reduce acute traumatic brain injuries among skeleton athletes and improve racing performance. Extensive use of AI models to fine-tune designs and perform dynamic risk-reduction and performance assessments.
- Invented a system to reduce acute traumatic brain injuries and improve skeleton racing performance. Open-sourced the design, enabling growing adoption across the sport at all levels.

GLENVIEW CAPITAL MANAGEMENT, *hedge fund* **New York**
MBA Intern Analyst **March 2022 – August 2022**
- Built and implemented analytical models focused on the tech sector for the investment team.

OPTUM FRONTIER THERAPIES/UNITED HEALTH GROUP **Remote/Global**
MBA Intern, Product Manager, Strategy and Business Development Associate **June 2021 — September 2021**
- Guided specialty pharmacy strategy against revenue targets by identifying and bidding for target specialty drugs. Built an automated drug tracker that reduced headcount by 1.5

HYPERGIANT (AI/ML/DoD Startup) **Remote**
MBA Intern, Product Manager in the AI/ML product for automatic rust detection on vehicles **Apr 2020-Aug 2020**
- Led teams through delivery and successful DoD handoff of a machine learning product to identify rust on Humvees and other military vehicles in harsh environments.

CV3D Medical Education Platform, *innovative startup to change the paradigm of medical education* **Cambridge, MA**
Chief Product Officer and Head of Business Development **2018 – 2019**
- Set product direction and go-to-market strategy for an online 3d-based medical education platform; reduced development burn rate by 40% (USD 25k per month)

ORACLE **Remote/Redwood Shores, CA**
Product Manager, ERP Cloud Product **2014 – 2016**
- Helped lead go-to-market strategy, development, and innovation for Oracle's flagship financials product through its shift to cloud-based delivery during rapid cloud industry growth
- Initiated product interaction modernization and streamlining, increasing customer satisfaction and significantly reducing deployment and development costs and product pricing

---

Awards and Honors:
- 2x Olympian (2018, 2026)
- 10x national champion
- Forbes 30 Under 30

Additional Information:
- Deep experience using AI models for product ideation, brainstorming, and go-to-market strategy
- Highly proficient with a broad suite of AI tools, including deploying agentic teams
- Languages: English and Hebrew, fluent; Japanese, beginner; Python and Excel excellent
- Avid traveler, have circumnavigated the globe multiple times and run a points/miles consulting service
